

Email Threat Investigation Report

AI-Powered Email Threat Detection & Forensic Intelligence

Case ID

0d935ae5-5d4c-4c49-a5d3-202134576ff9

Generated

08 Sep 2026 16:24 UTC

RISK ASSESSMENT	CASE STATUS	RISK SEVERITY
88 / 100	PARTIAL	HIGH

1. Executive Summary

Risk Score	88 / 100
Severity	HIGH
Risk Authority	Persisted deterministic risk engine result; AI interpretation cannot alter this value.
Case Status	PARTIAL
Sender	security@example.org
Recipient	target@example.net
Subject	Action required: verify your mailbox
Analysis Timestamp	08 Sep 2026 16:24 UTC

KEY RISK FACTORS

- SPF authentication failed. (+10)
- DMARC authentication failed. (+12)
- The sender and Reply-To domains differ. (+8)
- Deterministic detection identified display-name impersonation evidence. (+12)
- The message contains urgency or time-pressure language. (+6)
- The message requests credentials or account verification. (+12)
- The message contains a suspicious call to action. (+6)
- Threat intelligence reported a URL as suspicious or malicious. (+10)

2. Email Overview

From	security@example.org
Reply-To	verify@example.net
To	target@example.net
Subject	Action required: verify your mailbox
Message-ID	<phishing-02@example.org>
Date	01 Sep 2026 09:00 UTC
Return-Path	No data available
Original Email SHA-256	f3111e09816c850df7f0d80705cd6c5d0b38383a9696795c96a73c553e4692f4

3. Authentication Analysis

Control	Declared Result
SPF	FAIL
DKIM	NONE
DMARC	FAIL

4. Deterministic Findings

Finding	Severity	Description	Evidence
Urgency or time pressure	LOW	The message uses time-pressure language. Urgency is contextual evidence and is not, by itself, a phishing verdict.	Subject: Action required: verify your mailbox Text body: Verify your account immediately at https://login.example.com/verify?case=42 . HTML body: Verify your account immediately. Verify mailbox...
Credential or account verification request	HIGH	The message asks the recipient to verify an account or provide authentication information.	Subject: Action required: verify your mailbox Text body: Verify your account immediately at https://login.example.com/verify?case=42 . HTML body: Verify your account immediately. Verify...
Suspicious call to action	MEDIUM	The message directs the recipient toward an account, credential, link, attachment, or sensitive-data action.	Subject: Action required: verify your mailbox Text body: Verify your account immediately at https://login.example.com/verify?case=42 . HTML body: Verify your account immediately. Verify...
Sender identity inconsistency	HIGH	The supplied forensic evidence shows a sender/Reply-To mismatch or an authority-style display name combined with failed authentication.	From and Reply-To domains differ. Sender display name: Account Security
Phishing evidence cluster	HIGH	A credential-focused call to action is reinforced by urgency, identity inconsistency, authentication failure, or a URL indicator.	Subject: Action required: verify your mailbox Text body: Verify your account immediately at https://login.example.com/verify?case=42 . HTML body: Verify your account immediately. Verify...
Social-engineering language	MEDIUM	The message combines coercion, urgency, authority, or instruction-override language with an attempted recipient action.	Subject: Action required: verify your mailbox Text body: Verify your account immediately at https://login.example.com/verify?case=42 . HTML body: Verify your account immediately. Verify mailbox...

5. Indicators of Compromise

Type	Indicator	Verdict	Provider
DOMAIN	example.org	UNKNOWN	No persisted provider result
DOMAIN	example.net	UNKNOWN	No persisted provider result
IP_ADDRESS	8.8.4.4	UNKNOWN	No persisted provider result
URL	https://login.example.com/verify?case=42	SUSPICIOUS	DEMO-SYNTHETIC (not live verified)
DOMAIN	login.example.com	SUSPICIOUS	DEMO-SYNTHETIC (not live verified)

6. Threat Intelligence

Provider intelligence shown here was persisted during analysis; no provider was queried while rendering this report.

Type	Indicator	Provider	Verdict	Confidence
URL	https://login.example.com/verify?case=42	DEMO-SYNTHETIC (not live verified)	SUSPICIOUS	50%
DOMAIN	login.example.com	DEMO-SYNTHETIC (not live verified)	SUSPICIOUS	50%

7. Observed Mail-Routing Infrastructure

Observed infrastructure describes mail-routing systems and does not establish attacker identity or physical location.

RECEIVED-HEADER OBSERVATIONS

Order	From Host	By Host	Observed IP	Timestamp
0	sender.example.net	mx.example.net	8.8.4.4	01 Sep 2026 09:01 UTC

PERSISTED INFRASTRUCTURE GEOLOCATION

IP	City	Region	Country	ASN / Network	Organization
8.8.4.4	Demo City	Demo Region	Demo Country	AS0	Synthetic data - not live verified

8. Timeline and Evidence Events

#	Timestamp	Event	Description	Source	Evidence Refs
0	08 Sep 2026 16:24 UTC	ANALYSIS_STARTED	Analysis started	orchestrator	None
1	08 Sep 2026 16:24 UTC	ENRICHMENT	Email forensics and detection completed	orchestrator	None
2	08 Sep 2026 16:24 UTC	ENRICHMENT	Threat intelligence and infrastructure enrichment completed	orchestrator	None
3	08 Sep 2026 16:24 UTC	FINDING	Deterministic risk scoring completed	orchestrator	None
4	08 Sep 2026 16:24 UTC	ANALYSIS_COMPLETED	Analysis completed with partial results	orchestrator	None

9. Analyst Notes

Analyst commentary - not part of original forensic evidence.

Senior Analyst 08 Sep 2026 10:00 UTC	Controlled QA note: validate the payment request through an independent channel before action.

10. Evidence Integrity / Case Metadata

Case ID	0d935ae5-5d4c-4c49-a5d3-202134576ff9
Case Status	PARTIAL
Analysis Completeness	PARTIAL
Analysis Timestamp	08 Sep 2026 16:24 UTC
Original Email SHA-256	f3111e09816c850df7f0d80705cd6c5d0b38383a9696795c96a73c553e4692f4

11. Warnings and Limitations

- DEMO MODE: threat-intelligence and infrastructure geolocation results may be synthetic and are not verified live provider results. Email evidence, hashes, deterministic detection, and deterministic risk remain real.
- Threat intelligence is incomplete; unavailable reputation remains UNKNOWN.

Forensic limitation: observed infrastructure geolocation describes mail-routing infrastructure and does not establish the physical location or identity of an attacker. This report summarizes platform-collected evidence and is not a legal or regulatory certification.
